Did you know?

Dogs will put just about anything in their mouths, so be careful when storing harmful substances like pesticides, cleaners, and antifreeze. And don't forget to keep hazardous substances away from your feline friends, too!

Dear **Patches**,

We offer a 10% discount on vaccines & annual exams when given on time!
Our records indicate that you are due for the following important health services:

• **Program Injectable 8.9 - 17.6 lbs 10/11/2008**

You're 7 years old! Now that you're an official member of the Senior Kitties Klub, you may have slowed down a bit, but you're still savoring your golden years. Because you are now aging much faster than your human companion, we'd like to see you more than once a year so we can keep a close eye on your health. From time to time we may recommend blood tests that can disclose problems before they show up on even the most thorough physical exam.

Sincerely,

Your friends at Your Veterinary Practice

Manage your pet's health online!

Thanks for visiting your Pet Portal! Now you can add your pet's photos to the Photo Gallery and choose one to display on your pet's page—and maybe even on future correspondence from us! New e-mail address? Let us know, so you can continue to enjoy your Pet Portal.

Your health recommendations:

Program Injectable 8.9 - 17.6 lbs: It's time for flea prevention! Those pesky little bugs can cause severe allergy dermatitis and carry tapeworms — not to mention that it takes months to fully eradicate them once they have a foothold in your house!

Keeping your recommended health services up to date is a very important part of keeping you healthy and happy. Please have your caretaker contact us to set up your next appointment.
