Dear **Patches**,

We offer a 10% discount on vaccines & annual exams when given on time!  
Our records indicate that you are due for the following important health services:

• **BORDETELLA BOOSTER 10/11/2008**

You're 12 years old! Now that you're officially a senior dog, you may have slowed down but you're still finding much to savor in your golden years. Because you are now aging much faster than your human companion, we strongly recommend visiting us more than once a year so we can keep a close eye on your health. From time to time we may recommend blood tests that can disclose problems before they show up on even the most thorough physical exam.

Sincerely,

Your friends at Your Veterinary Practice

## Manage your pet's health online!

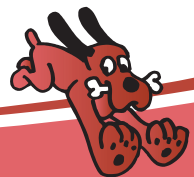

Keep track of your pet's wellness needs the easy way-on your Pet Portal! Plus, add your pet's photos to the Photo Gallery and choose one to display on your pet's page-and maybe even on future correspondence from us!  
Forgotten your password? Get a new one on our website.

## ***Your health recommendations:***

**BORDETELLA BOOSTER:** This vaccination helps protect you from Kennel Cough, a highly contagious respiratory disease. (Most boarding and grooming facilities require an up-to-date vaccination.)

Keeping your recommended health services up to date is a very important part of keeping you healthy and happy. Please have your caretaker contact us to set up your next appointment.
